

Forbidden triples generating a finite set of 3-connected graphs

by Yoshimi Egawa, Jun Fujisawa, Michitaka Furuya, Michael D. Plummer and Akira Saito

All of the referees' comments have been taken into consideration. As for linguistic comments and comments concerning obvious errors, we have made corrections in accordance with the comments. There is one comment concerning our argument in the proof, and what follows is a description of how we have responded to that comment (here pages and lines are those in the original version).

- **Pages 14 and 15** One of the referees pointed out that there are two flaws in our argument from Page 14, Line -8 to Page 15, Line 3. As is mentioned by the same referee, the flaws are not serious and, in the revised version, we have remedied them by following the suggestion of the referee.
