Comments to reviewer

We would like to thank the reviewer for his/her useful suggestions and comments. We incorporated all changes suggested by the reviewer:

- We added two pseudocodes (i.e. Algorithm 1 and Algorithm 2) to further clarify our algorithms.

- Section 5 now only contains the graphs which have Ramsey number $R(K_3, G) \geq 27$. All Ramsey numbers (including those with $R(K_3, G) < 27$) can now be obtained from `http://hog.grinvin.org/Ramsey`. We also included a reference to this website in our paper.

- We also improved the English in some places.
